YACKER TRACKER HELP & FAQ

Helping You to Understand Your Yacker Tracker

What to expect from your Yacker Tracker. We share this information with you so that when you think you have a defective unit you can verify what to expect from a correctly working unit.

- The Yacker Tracker was developed to help students self monitor the noise level in the classroom setting.
- Unit can be used with Adapter (provided) or with 6 AA batteries (not included).
- The front of the unit contains a sound meter that picks up the level of noise in a room.
- Where the unit is placed or facing makes a difference (suggestions: do Not place it near a door that will be constantly opening and shutting, or in the front of the classroom where direct instruction or writing on a whiteboard will take place as the unit will pick up on the closet noise).
- It is suggested that you try your Yacker Tracker in different locations in your room to see which location best tracks the noise level in your classroom. Mounting on the wall will alleviate the problem of the unit being placed behind something that will block the microphone's efficiency of picking up sounds.
- User has an option of Siren only, "Quiet Please" (in: English, German, French, Spanish or record your own 15 second personal message). Toggle alert sound by pressing MODE button on back of unit. Noise must register for longer than 2 seconds before lights and sounds are activated.
- To record your own 15 second personal message, press and hold REC button and start speaking into the microphone (MIC) after you hear the first *beep* sound. Your recording will stop when you either release the REC button or when you hear a second *beep* sound after 15 seconds.

button and start speaking into the microphone (MIC) after you hear the first *beep* sound. Your recording will stop when you either release the REC button or when you hear a second *beep* sound after 15 seconds.

Troubleshooting Guide

IF:	Then:
Unit does not work or the lights don't work properly:	Make sure the adapter is plugged into the unit and the power cord is plugged all the way into

TESTIMONIALS

“ **Marian Scadden**
Cwerks Interactive Theatre

Thank you! Theater teachers--what a group--we're trying to get the kids to be louder while the poor classroom teachers are having to sush the children. I love using the Yacker Tracker because it's such a nice visual. The kids think I'm picking on them when I tell them to repeat/project/ louder. But when I bring out the Yacker Tracker, they can see for themselves--Yay!

“ **Paul Pope, RN BSN ONC**
Assitant Director of Inpatient Orthopedic Nursing
St. Johns Hospital

Just wanted to let you know that I plan to use my Yacker Tracker in the nurses station at the hospital where I work. Noise levels, especially at change of shift, continue to be problematic. I am hopeful that the YT will help to raise awareness of noise (particularly voice noise) and its impact on patient comfort.

Mom

Hello, I just wanted to let you know that we are a family of 9 with 7 adopted children. Most of them

the power outlet or, if using batteries, check battery position for correct polarity (+/-). Otherwise, replace with a brand new set of 6 "AA" batteries. It is recommended to use Alkaline batteries.

The siren doesn't work:

Make sure you are in the Siren mode by pressing the MODE button to toggle through the various modes.

The unit is not functioning properly after troubleshooting:

Return unit to the retailer or catalog from which it was purchased for exchange. Proof of purchase receipt is required.

The Yacker Tracker is designed to be used with the include AC Adapter (input: 100-240V AC 50-60Hz, output: 9V DC 500mA). Using incompatible adapters may result in damage to the unit.

Replacement adapters are available for purchase Contact us for a dealer in your area.

have ADHD,ADD,ODD, PTSD, and attachment issues. One of my children screams every night before bed, Another cries like an infant if angry and another just can't control there noise levels. The Yacker Tracker had made everyone in the home aware of the noise they each make and has helped them to gain additional control. I thought you should know that a family can use this too. :) Thank You

Save your proof of purchase receipt. With the purchase information you provide, retailers will be able to confirm the purchase date of your product. This confirmation is of benefit to you. Returns or exchanges of defective units may not be authorized without a purchase receipt.

Decibel Levels on Yacker Trackers

LEVEL	YELLOW LIGHT	RED LIGHT
1	50	65
2	60	75
3	70	80
4	75	85
5	80	90
6	85	95
7	90	100
